SUMMARY

Cybersecurity student at DePaul University (B.S.) with hands-on experience in cloud security, detection engineering, DevSecOps, and identity and access management, plus a deployed web application. Builds complete projects end to end, documents them clearly, and understands the security reasoning behind every decision.

EDUCATION

DePaul University — Chicago, IL

2026 – Present

B.S. in Cybersecurity, Minor in Software Engineering (planned) | Jarvis College of Computing and Digital Media

College of DuPage — Glen Ellyn, IL

Graduated May 2026

A.A.S. in Cybersecurity & Defense | GPA 3.8 | Academic Honors | Phi Theta Kappa Honor Society

TECHNICAL PROJECTS

Cloud SOC Detection Lab — Microsoft Sentinel, KQL, MITRE ATT&CK

2026

- Connected Microsoft Entra ID logs to a cloud SIEM and wrote KQL queries to hunt sign-in and audit activity, including parsing nested JSON fields.
- Built a scheduled analytics rule mapped to MITRE ATT&CK that detects privilege escalation and raises incidents, then triaged them from assignment through classification.

DevSecOps Pipeline — Terraform, GitHub Actions, tfsec, Checkov, AWS

2026

- Built a CI/CD pipeline that scans Terraform on every commit and caught seeded flaws: public S3 buckets, SSH open to 0.0.0.0/0, and missing encryption.
- Remediated with KMS encryption, S3 public access blocks, and least-privilege rules; configured advisory vs. blocking gates with documented suppressions.

Identity & Access Management Lab — Microsoft Entra ID

2026

- Implemented RBAC and least privilege across the Joiner-Mover-Leaver lifecycle; detected and remediated an unauthorized privilege escalation using audit logs.

Password Security Tool (Live Web App) — JavaScript, Web Crypto API

2026

- Built and deployed a strength checker, three-mode password generator, and breach checker using k-anonymity with local SHA-1 hashing, so passwords never leave the browser. [Live demo](#).

COLLEGE PROJECTS

Enterprise Network Lab — Cisco Packet Tracer

College of DuPage

- Built a three-VLAN network with router-on-a-stick inter-VLAN routing and ACL-based security policies to control traffic between segments.

Computer Forensics Case Investigations

College of DuPage

- Used forensic software in hands-on simulated cases to recover data, analyze evidence, and reconstruct what happened.

EXPERIENCE

Locker+ Associate — Amazon

Oct 2025 – Aug 2026 · Downers Grove, IL

- Provided front-line customer and technical support, resolving on-site system and device issues in a fast-paced, high-volume environment.
- Trained and onboarded new hires on systems and workflows, and kept accurate records and documentation.

Cyber League CTF Competitor — College of DuPage

College of DuPage

- Competed on a team in a Capture The Flag event, solving security challenges collaboratively under time pressure.

CERTIFICATIONS

- Cybersecurity Specialist Certificate and CIT CCNA Certificate — College of DuPage, both awarded with High Honors (2025)
- CompTIA Security+ (in progress) · AWS Cloud Practitioner (in progress)

SKILLS

- **Cloud & Security:** Microsoft Sentinel, Entra ID, Azure, AWS (IAM/S3), KQL, MITRE ATT&CK, incident response, RBAC, least privilege
- **DevSecOps:** Terraform, GitHub Actions, tfsec, Checkov, Git/GitHub, Docker
- **Systems & Networking:** Linux (Ubuntu home server: UFW, fail2ban, Tailscale, Pi-hole), Windows, macOS, TCP/IP, DNS, DHCP, VLANs, Cisco routing & switching
- **Development:** JavaScript, HTML/CSS, Java, REST APIs, technical documentation
